ALBERT EINSTEIN

(T. of I. April 5, 08 – Andrea Whitaker)

1. "The most beautiful experience one may enjoy is a 'sense of mystery'."

2. "You will hardly find one among the profounder sort of scientific minds without a religious feeling."

3. Einstein called his religion "Cosmic religion."

4 Einstein felt closest to the XIX th century Jewish philosopher Baruch Spinoza. Spinoza's greatest belief was in a universal determinism: all events, including the actions of human beings, followed a precise law of cause and effect.

5. Einstein found the elements of cosmic religion in the Psalms and

29 P.T.O.

the proverbs of the bible, and particularly in Buddhism.

6. Einstein took clear that God was to be found in the laws of the universe, and not in Nature itself.

How do I happen to be on
Who or what was I before I came here?
this earth? I had no choice
being here. I shall have no choice
about it.
about how and when I shall leave
this earth. Why do I think I have any
volition about anything that
happens in-between??

I would not want anyone to
tell me or give me anything that
is to be kept a 'secret'. I have
become so transparent that
nothing is likely to remain a
secret with me.

I am told: "I am Brahman";
"You are That".

I would prefer to ask who is this
"me" and "you". Do I really see any
"me" or "you" or "him"?
